## PSI Block Center Press Model #386

Put your hammer and punch away. PSI has eliminated all the hassles involved in removing and replacing block centers. The PSI Block Center Press was created to facilitate the removal and replacement of the centers from Gerber blocks. It is important to change out centers because they wear and can cause prism, axis deviations and uneven fining and polishing. This is a one-of-a-kind unit that will save you time and money.

### Features & Benefits

- Easily removes and replaces Gerber block centers.
- Dowel pins provide even pressure for removal of centers without breaking.
- Pressing tool is included for precise replacement of the centers to prevent prism, axis deviations and uneven fining and polishing.
- Circular bottom plate is designed to catch center when punched out.
- Comes with 4 extra dowel pins for center removal.
- Replacement dowel pins available (part #386-3)

## Replacement Centers Part #3773

- Fits all block types.
