

Recycling & Filtration Systems 952 for Coolant

PSI's 952 filtration and recycling system is a simple, yet highly effective, way to recycle coolant for generating and edging. Designed to replace the generator coolant tank or edger bucket, the 952 saves money and time spent refilling coolant tanks and buckets. With the use of a chiller, coolant can be temperature controlled yielding better lens quality and reducing spoilage from waves and aberrations.

Features & Benefits

- Eliminates messy buckets, reducing labor for emptying and cleaning up.
- Easy to move on mounted dolly.
- Removal of swarf and use of temperature control keeps diamonds free cutting and wheels cutting cooler, extending their life as well as yielding better lens quality.
- Large filter bag removes large pieces of lens material from coolant before it is pumped back into the machines for reuse and provides easy waste disposal.
- Units can be customized to meet individual generator specifications. Contact PSI at 800-237-8154 for more information.

Specifications:

Dimensions: 22" H x 19" W x 17" D
 Tank: Heavy duty, high impact plastic
 Tank Capacity: 15 gallons
 Serves: 2 edgers or 1 generator
 Pump: Little Giant Submersible
 Electrical: 115V, 3.2 Amp, Single Phase, 60Hz
 Shipping Wgt: 52 lbs.

Options & Accessories:

Description	Used For	Part #
175µ Nylon Filter Bag	all purpose	1104
250µ Nylon Filter Bag	poly & Plastic	1108
150µ Nylon Filter Bag	plastic only	1112
Cooling Coil	temp. control	3911-SSF

System Includes: High impact plastic tank, 1" wide iron dolly with ball bearing swivel casters, aluminum bag rack (filter bags sold separately) and Little Giant Pump
