

## REUSABLE Cloth Bags & Air Filters for Vacuum Filters, Coolant Tanks and Exhaust Filters

PSI now has a better way to handle the debris created by cutting lenses in dry cut edgers, generators and for use in various other dust and swarf collection systems as well as 140 liter coolant tanks and air filters. The new reusable cloth bags will save the lab money while helping the environment.

### Vacuum Filter Bags

- **Easy On The Environment** – No paper bag disposal
- **Reduces Consumable Costs** - For a little more than the cost of one box of OEM paper bags, PSI's Reusable Cloth Bags will last longer than paper bags if maintained properly and handled with reasonable care.
- **Eliminates The Mess Of "Wet" Paper Bag Failure** - The ODC-1 reusable cloth vacuum bag does not fall apart when exposed to moisture when using the "Water Mist Edge-Polishing Feature" on Optronics dry edgers.
- **Reduces Replacement Part Costs** – The cloth filter cover included with the ODC-1 filters dust that would normally pass through the vacuum motors while not becoming clogged like paper covers. By improving the removal of lens particulates (poly swarf) it extends motor and cutter life and improves lens edge finish quality.
- **Debris deflector** easily attaches to hose outlet of shop vac. Deflects debris down into the bag extending the life of the vacuum bag.

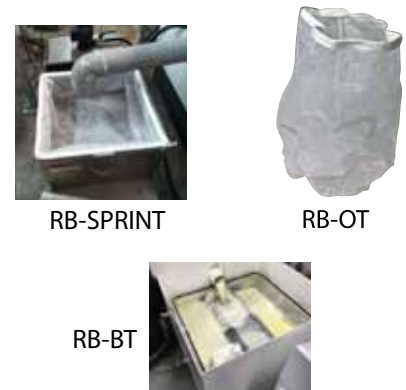

Part #s:	ODC-1	for Optronics dry cut edgers and generators as well as Nilfisk vacuums and filter cover)
	RB-GEN	for SG-X generator vacuums
	RB-Q	for Quatro & Quatro Velocity vacuum systems
	RB-DD	Debris Deflector for shop vacs

### Coolant Tank Bags

- **Finished edges** – the RB-CT has an elastic top and the RB-OT has a finished edge with drawstring
- **Longer lasting** - made of quality materials so the bags last longer

Part #s:	RB-CT	coolant tank wet bag for ES3 edger and V-series generators - fits 140 liter coolant tanks; 150µ 114" circular x 28" L with elastic top
	RB-OT	coolant tank bag for Opto-Tech machines, 400 µ, 16" dia. x 24"
	RB-VFT	coolant tank bag for VFT-Micro digital machines, 200µ
	RB-SPRINT	150µ coolant tank bag, can be used with Sprint generators
	RB-SPRINT-300	300µ coolant tank bag, can be used with Sprint generators
	RB-BT	For Bazel Coolant System

**To Order Call PSI at 800-237-8154!**

### Air Filter

- **Reuse your frame** – Quality filter fits over machines existing frame for easy use and disposal

Part #: AF-ES3-200 Exhaust Filter for ES3, 200 $\mu$ , 6 to a pack

AF-ES3-200

### Universal Bag

- For collecting swarf off edgers & generators eliminating the need to frequently scoop swarf from coolant tanks
- Zipper and handles make for easy disposal of swarf

Part #: RB-GB1 Short (25"W x 18"H)  
RB-GB2 Tall (18"W x 25"H)

RB-GB1

Handles for easy disposal

Zipper on top for easy disposal
