Surfacing Additives & Coolants

Finishing Water Additive

Provides clean, trouble free fining by cleaning and lubricating fining pads for increased stock removal rates. Eliminates swirls and particle buildup on pads which can occur with softer lens materials. Ideal for labs in areas with hard water. For use in cylinder machine bowls or in filtration and recycling systems.

Part #: 1110G - gallon

Antifoam

PSI's Antifoam is a concentrated silicone emulsion that will control foaming in all recirculation operations. Used for generator and edger tanks as well as fining water systems. Safe to use on hard coated lenses. Not for use in polish.

Part #: 2121Q - quart; 2121G - gallon

Pan Handler Additive

This settling agent for Pan Handler wastewater treatment systems pulls waste particles out of water and settles them to the bottom of the tank for easy disposal. Pan Handler Additive is not a wastewater treatment, only a settling agent. This product is recommended for use in PSI's 860 Pan Handler.

Part #: 2120G - gallon

Foam Free

Foam Free is a powerful, silicone-free defoamer. It quickly eliminates bubbles and foam from polishing compounds. Foam Free comes in an 8 oz. dropper bottle. Just add one drop at a time up to 10 drops for each gallon of polish until foam dissipates.

Part #: 2180 - 8 oz.

Cad-Con

Cad-Con is an easy to use, inexpensive wastewater and polish treatment for the disposal of cadmium and lead in labs using alloy blocking. It separates the cadmium and lead particles from the wastewater and seals them so they become inactive and safe for solid disposal. For use in a bucket or with a PSI Pan Handler System.

Part #: 1000 - 8lbs.; 1000-1 - 1lb.

BioCool

BioCool is a biodegradable, non-toxic coolant for all lens types. It helps prevent equipment rust and provides superior lubricity. It is non-foaming, oil free and resists bacterial growth.

Part # 1500P - 5-gallons

PractiCool

PractiCool is a fully synthetic, water based coolant that contains a special polymeric additive to provide rapid swarf settling along with a rust inhibitor for superior corrosion protection for all machine surfaces.

Part #: 1600G - gallon; 1600P - 5-gallons

Dry Coolant

This is a highly stable, freeze dried coolant that offers an indefinite shelf life. Ideal for saving on shipping and storage costs. Contains antifoam, rust inhibitor and a descaling additive to prevent swarf buildup and biocides so it always smells fresh.

Part #: 1575 - 1lb.
