GO FOR GOLD

OLEO - GOLD

Blocking Pads

Go for gold when edging hydrophobic and oleophobic lenses. Oleo-Gold Blocking Pads have a specially engineered hybrid adhesive that will prevent slippage. In addition to that, they are made with a strong, high density PE foam carrier with high axis torsion resistance making them the perfect choice when edging coated lenses.

The specially engineered adhesive on the gold tabbed side is for the lens while the side with the red tab is for the block.

Features & Benefits

- Specially engineered aggressive hybrid adhesive to reduce slippage
- Conformable closed cell PE foam carrier is highly axis torsion resistant
- Works on all coated lenses

Specifications:

Part #:	6805 - 24mm round 6818 - 18mm round
Dimensions:	24mm x 29.6mm round 18mm x 23.4mm round
Quantity:	1,000 per roll
